DETAILED ACTION

Allowable Subject Matter

Claims 4-15 are objected to as being dependent upon a rejected base claim, but would be 1. allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for allowance

2. The following is an examiner's statement of reasons for allowance:

Claims 5-9 are allowed with the same reasons set forth in the previous Office action (mailed on 6-28-2004).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3 and 16, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ziv (U.S. Patent No. 6,292,662) in view of Chung (U.S. Patent No. 5,706,282).

Regarding claims 1 and 16, Ziv teaches procedure to improve the audio quality in a mobile radio network (see fig. 1, col. 2, lines 45-58), with which a tone control that is switched into one of the communication connection's corresponding audio paths (see figs. 1-2, col. 2, lines 45-67, and col. 4, lines 34-64), that, dependent upon the types of end device(s) or equipment

Art Unit: 2684

being used in the connection (see col. 4, lines 27-30). But Ziv fails to teach influences the audio quality in the audio path in that a frequency response of a sound in the audio path is changed.

However, Chung teaches influences the audio quality in the audio path in that a frequency response of a sound in the audio path is changed (see col. 2, line 13-col. 3, line 25, and col. 3, lines 50-62, col. 4, lines 43-67).

Therefore, it would have been obvious to one of ordinary skill in the art at the time invention was made to modify Ziv system and by the provide of the teaching of Chung on the maintained the bandwidth and power level when the audio path is changed so that the quality of audio signal of the system can be improve (see col. 3, lines 54-57 and col. 4, lines 47-50).

Regarding claim 2, Ziv teaches influences the audio quality that is different in the connection direction from the caller to the called user and from the called user to the calling user (see col. 2, lines 48-64 and col. 5, lines 3-27).

Regarding claim 3, Ziv teaches the base station control, as well as the mobile switching center, that determines the end device type (s) by query of the mobile equipment identification and assigns to the appropriate end device type corresponding pre-determined parameters, which serve to adjust the tone control (see fig. 2, col. 4, lines 27-67).

Response to Arguments

5. Applicant's arguments filed on 9-16-2005 have been fully considered but they are not persuasive.

Regarding claims 1 and 16, Applicant argues that the reference of Ziv fails to teaches a tone control switched into the audio path that influences the audio quality dependent on the types of end devices by changing a frequency response of a sound in audio path. However, Examiner is agreed with the applicant for the Ziv reference. But Examiner does not agree since the Ziv reference teaches a tone control switched into the audio path that influences the audio quality dependent on the types of end devices (see figs. 1-2, col. 2, lines 45-67, and col. 4, lines 34-64 and col. 4, lines 27-30). And the reference of Chung teaches influences the audio quality in the audio path in that a frequency response of a sound in the audio path is changed (see col. 2, line 13-col. 3, line 25, and col. 3, lines 50-62, col. 4, lines 43-67). Therefore, the combination of the reference of Ziv and Chung are teaching the limitation of the claim.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(571) 273-8300, (for Technology Center 2600 only)

Hand-delivered responses should be brought to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314)

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Trinh whose telephone number is (571) 272-7888. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiners supervisor, Nay Maung, can be reached at (571) 272-7882.

The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Technology Center 2600 Customer Service Office** whose telephone number is **(703) 306-0377**.
